EDUCATION

Sukkur IBA University — B.S. in Software Engineering *Aug 2024 - May 2028*

Currently in 5th semester of undergraduate study

- Recipient of the Sindh Talent Hunt Program (STHP) scholarship, a fully funded undergraduate scholarship

EXPERIENCE

Backend AI Engineer Intern — FlyRank AI *July 2026 – Aug 2026*

- Selected for the Backend AI Engineering track of the July 2026 cohort
- Build and integrate backend functionality that connects application logic with AI-related services and APIs
- Work with APIs to support AI-assisted features within backend systems
- Strengthen debugging and practical software engineering skills through hands-on backend work
- Learning how AI capabilities can be integrated into backend architecture

Frontend Developer — WamtSol Pvt Ltd *Jan 2022 – Nov 2023*

- Built responsive web interfaces using HTML, CSS, Bootstrap, JavaScript, and Angular
- Gained professional experience working within a live software development environment

Web Development Mentor *Jan 2022 – Nov 2023*

- Mentored learners in HTML, CSS, Bootstrap, JavaScript, and Angular through practical, example-driven sessions
- Communicated technical concepts clearly to beginners and supported them through hands-on exercises

PROJECTS

Hospital Management System *React · Node.js · Express · MongoDB · JWT · Axios*

- Developed backend REST APIs for authentication, doctors, patients, appointments, departments, and administration modules
- Implemented JWT-based authentication and integrated backend APIs with a React frontend
- Achieve CI/CD pipeline through Github Action, use Docker, ngnix, Deployed on AWS

FastAPI AI Chatbot *Python · FastAPI · React · SQLAlchemy · Pydantic · Gemini API*

- Built a full-stack chatbot with a FastAPI backend and React frontend, including authentication and data validation
- Integrated the Gemini API for AI-powered responses and connected it to a database using SQLAlchemy
- Resolved CORS issues and configured deployment for frontend/backend communication

Zikr-ul-Quran — Playlist Management System *React · Spring Boot · MySQL · Doubly Linked List*

- Applied data structures concepts to a practical application by implementing playlist functionality with a doubly linked list
- Built the application using a Spring Boot backend, MySQL database, and React frontend

Cotton Disease Detection & Prevention System *University Software Engineering Project*

- Authored requirements documentation, including SRS and SDS, and contributed to overall system design

TECHNICAL SKILLS

Backend: Node.js, Express.js, FastAPI, Spring Boot, REST APIs, JWT Authentication, bcrypt/Password Hashing

Frontend: React, Next.js, Vite, Angular, HTML, CSS, JavaScript, Bootstrap, Tailwind CSS

Languages: JavaScript, Python, Java, PHP, SQL

Databases: MySQL, Postgresql, MongoDB, Firebase

Tools & Platforms: Git, GitHub, VS Code, Postman, Docker, XAMPP, Laragon

AI / Applied: Generative AI API integration (Gemini), AI chatbot development, FastAPI-based AI applications, backend AI engineering exposure

LEADERSHIP & EXTRACURRICULAR

- Currently serving as an executive member of Public Speaking and Literary Club at Sukkur IBA University.
- Active member of the Sports and Adventure Club at Sukkur IBA University; helped organize and participate in Sport Gala 2025.
- Mentored web development learners, building communication and teaching skills alongside technical ones.
